USE BAKING PAPER

Remark

Baking time and temperature can vary according the type of oven. Make sure the oven is properly preheated. While preheating, set the oven 25°C higher than the specified baking temperature. Because opening the oven causes the temperature to drop.

Add steam at the beginning of the baking process. This gives you a crispier, puffier finish. Allow the steam to escape 5 minutes before the end to ensure that the products are fully baked.
